

BUYING A TEST

How much will my test cost?

PCR test cash price: \$155

Antigen test (New York State only): \$65; no charge for Medicare/Medicaid.

Will my insurance pay for my test?

Your health insurance plan may reimburse you for the cost of the test. You should check with your insurance plan to confirm your eligibility. Prescriptive will provide you with a receipt to facilitate your request for reimbursement.

What if I am covered by Medicare or Medicaid?

Those covered by Medicare or Medicaid can schedule a test and receive results at no cost. You must select the Medicare / Medicaid BinaxNOW test option when scheduling your appointment.

Are there any other costs?

No, our price is all inclusive.

Which test should I take?

If you need a quicker result, Antigen tests provide results same day. PCR tests are the most accurate but take 2-3 days for results.

Why is my mobile phone number required?

Results are sent via mobile text message, which is the most secure and expedient way to deliver them.

THE TEST

What should I bring for my COVID-19 test?

Bring a valid photo ID and your mobile device with your myrx.io test page open.

What should I do when I get there?

Wear a mask, follow the signs for testing, and check myrx.io for any additional instructions. The process will take about 20 minutes.

What will the test tell me?

The test detects if you have the virus at the time of the test. It does not detect immunity or whether you had the virus in the past. Therefore, you should continue to remain cautious even if your result is negative because infection is still possible.

What will happen at my appointment?

Please read instructions specific to your pharmacy. Follow signs for testing (this is likely outside).

Can I bring anyone to my appointment?

Please try not to bring anyone to the appointment who is not being tested through this program, especially if they are feeling unwell. The exception would be for those who require a means of transportation for accessibility reasons.

YOUR RESULTS

How will I get my results?

You will receive a secure text message that directs you to a secure page on myrx.io containing your test results.

If you test positive:

- The virus was detected in our sample and it is quite likely you have COVID-19
- You should self-isolate to avoid spreading the virus to others.
- You should engage your primary care provider for treatment and follow-up.

If you test negative:

- The virus that causes COVID-19 was not found in your sample.
- This can mean one of two things. You were either not infected with COVID-19 at the time of your test or that your sample was collected too early in your infection to register. In the latter case, you could still become infected with COVID-19 after the text and spread the virus to others.

I have questions about my results, who do I call?

Please call your pharmacist or primary care provider.

I have a positive result who do I contact?

Please call your primary care provider for treatment and follow-up.

CHANGE YOUR APPOINTMENT

How do I change my appointment?

You can change, cancel, or rebook your appointment via the text link you received to confirm your appointment.

Will I be charged if I change or cancel my appointment?

You will receive a full refund if you cancel your appointment within the cancellation window (at least 24 hours prior). Cancellations within 24 hours of your appointment time will be considered a “no show” and you will be charged accordingly.

ABOUT PRESCRIPTIVE

Who is Prescriptive?

Prescriptive is a healthcare technology company that is dedicated to empowering consumers. Our "mobile first" platform provides access, transparency and control with prescription costs and COVID-19 testing.
