Pg 1 About Prescriptive

Pg 2-3 Using the SmartPRICE savings card

About Prescriptive

Who is Prescriptive?

Prescriptive Health is a healthcare technology company delivering solutions that empower consumers with the information they need to make informed decisions about their health.

Our cloud-based Health Intelligence Platform allows us to operate more efficiently, remove middlemen, support local pharmacies, and ultimately reduce costs, which are then passed on to you in the form of lower prices.

I have questions. How can I get help?

Your pharmacist can answer many of your questions. You can also send us questions any time via email at

SmartPRICE@prescriptive.com

Introducing the **SmartPRICE™** savings card

What is the SmartPRICE savings card?

This savings card allows healthcare consumers to save money on prescription drugs through participating pharmacies. SmartPRICE was created by Prescriptive Health, a healthcare technology company. We contracted directly with manufacturers and pharmacies to reduce costs and pass those savings on to healthcare consumers.

How do I use SmartPRICE?

Register online for free at myrx.io, confirm your eligibility, and purchase from a participating pharmacy at discounted prices.

Who is eligible for SmartPRICE?

Our goal is to make medications more accessible and affordable for everyone. Due to privacy laws, consumers must be older than 13 years of age to register for a SmartPRICE account. In addition, consumers enrolled in federal or state-funded healthcare programs (e.g., Medicare, Medicaid, VA, CHAMPUS, TRICARE, or similar programs) are not eligible to use SmartPRICE for featured medications.

Is there a cost associated with signing up?

No. SmartPRICE is free to join and there are no purchase requirements or fees.

How does SmartPRICE work with my insurance?

SmartPRICE is not insurance and cannot be combined with insurance benefits. Any prescriptions filled using SmartPRICE do not count toward your insurance deductible or out-of-pocket maximum. You should evaluate the cost of your medication through SmartPRICE versus your insurance and choose the best option for you.

Where can I use the SmartPRICE savings card?

Participating pharmacies can be found on the account confirmation screen. We're always adding more pharmacies so check back frequently for more options.

How much will I save?

Most consumers will save up to 80% on their prescriptions.

Where can I learn about the terms of use?

Learn more at:

<https://prescriptive.com/savings-plan-terms/>

How do I find the price of my medication?

The pharmacy will provide you with the price of your medication. The actual price you will pay will be determined at the time of purchase and will depend on the medication, form, dosage, and quantity. We do not guarantee the availability of any particular product or the specific price of any product.

Which medications have eligibility restrictions?

SmartPRICE offers savings on many medications, both generic and brand. However, there are some medications with age and benefit restrictions. These include Humalog, Humulin, Insulin Lispro, Basaglar, and Trulicity.

Why do I need to provide my phone number to sign-up?

A SmartPRICE card is unique to each user. We request your phone number to verify your identity and keep your information secure. Your phone number also helps you access MyRx, a mobile portal for scheduling other services at participating pharmacies.

How does using this card help pharmacies?

Most prescription savings cards make money by charging the pharmacy fees to fill each prescription. Those fees can quickly add up and make it challenging for an independent pharmacy to continue accepting the card. SmartPRICE is different because it was built to support independent pharmacies by enabling them to offer fair, competitive prices to consumers without incurring high fees.
